TRANSFORM YOUR SPACE

TRANSFORM YOUR SPACE

Trent Design Group can help you make the most of your workspace with practical storage solutions, clever shopfitting and innovative interiors, from concept to completion. Our years of expertise covers everything from pallet racking to mezzanine floors, shopfitting to interiors and complete design solutions.

We have an outstanding track record, working with blue chip companies including Next Plc, Makro/Metro Self-Service Wholesalers and Kitbag.com. Our experience in building refurbishment has made us experts in many aspects of interior project management, such as partitions, air conditioning and suspended ceilings. Our knowledge of safety regulations is second to none. All delivered by experts in the UK and around the globe.

We work in partnership with our clients to help manage your budgets and timescales. We're good listeners. Once we understand what you want to achieve, we can deliver practical, cost-effective solutions - on time and on budget.

MAKE THE MOST OF YOUR SPACE

Our pallet racking systems offer safe and secure storage for goods on pallets and help you make the most of the space available.

Bespoke Design

We work with you to design the most efficient storage system and layout for your warehouse. There are a number of factors that influence the design – what type of pallets you use, the type of handling equipment and stock rotation needs.

Better Product Handling

As well as making the most of the space available, pallet racking offers better storage for your goods, reducing the chances of damage to your products.

Safer Working Conditions

The excellent safety record of pallet racking systems will also mean that your warehouse operators will be able to move safely and efficiently around your warehouse.

RACKING SYSTEMS CASE STUDY **EMT HEALTH CARE**

EMT Health Care, a supplier to independent pharmacies, had out grown their existing warehouse. Our proposal removed existing low-level shelving and installed a mezzanine floor with adjustable pallet racking below, to offer increased pallet storage capacity and allow small items to be picked from the shelving beneath.

The Design was right, the people professional and the price was right - what more could a project manager ask for?

Neil J Robinson
Independent Projects Manager

OPEN UP MORE SPACE

We construct mezzanine floors within existing buildings, to open up extra space for offices, storage or work areas. This can make a huge difference to your space and your business overnight.

Fast and Cost Effective

Transform your working space rapidly, doubling or even tripling the original floor area. Because they are free standing, mezzanines can be installed rapidly with minimal disruption to your day-to-day business.

Safety and Versatility Built-In

You can choose from a wide variety of options and accessories so your mezzanine floor is perfect for your needs and meets all the necessary safety regulations. But we don't just stop at simple mezzanines. We can build two and three tier floors, staircases, bridges, walkways, cat ladders, lifting devices, pallet gates, and fire protection. We'll take a good look at your needs and come up with a smart solution that will give you the most flexibility and return on investment.

Precision Engineering

Our floors are pre-engineered off-site and installed rapidly by our own engineers. Precise, high-quality production techniques ensure they come together perfectly on-site.

MEZZANINE FLOORS

Mezzanine floors are a great way to make the most of unused parts of your premises. High ceilinged buildings can be expensive to heat or cool and really be a complete waste of space. Rather than move to bigger premises, a mezzanine floor can turn this currently redundant space into extra retail space, stylish offices or useful storage, while leaving the rest of your operations undisturbed below. Installation is quick and simple. And the all-round expertise of Trent Design, we can help your business expand without expensive relocation costs.

TRANSFORM YOUR WORKING ENVIRONMENT

Whether you're starting a new business, moving to new premises, bringing in new people or want to change the way your staff work, our approach can make a real difference.

From Drawing Board To Fit Out

We've built our business on creating effective work environments that offer innovative and efficient use of space. Our experts offer a seamless end-to-end service, from planning to fit out and commissioning.

Making Your Space Work

Whatever sector you work in, it's likely we have experience in that area. As a result, we can offer solutions that understand the particular needs of your sector, whether it's a hospital, food processing factory or car plant. That doesn't mean we take a one-size-fits-all approach – we approach each challenge with a fresh eye as well as an experienced one.

Specialist Skills

Working closely with specialist partners including Komfort Office Environments, Tennon Partition Systems and British Gypsum Drylining Systems, the combination of our expertise and their high-end products will create the space you need to make your business work harder.

Services:

- ▶ Partitions
- ▶ Modular Partitioning Systems
- ▶ Suspended Ceilings
- ▶ Window Blinds
- ▶ Air Conditioning
- ▶ Drylined Systems
- ▶ Heating, plumbing, electrical services
- ▶ Painting and decoration

INTERIORS CASE STUDY DUSK TILL DAWN

Dusk Till Dawn is unique – the largest and only poker-dedicated venue in the UK. In fact, it is one of the largest clubs of it's kind in Europe. Trent Design took the club's vision and brought it to life - managing every step from design, through build and management of the project. The project included everything from high-quality finishes, partitions, suspended ceilings, glazing and artwork.

“Trent Design exceeded our expectations and turned our concept in to reality... producing a high quality establishment that we were striving for.”

Nick Whitten

Dusk Till Dawn - Operations Director

MAKE YOUR SPACE MORE EFFICIENT

Our shelving systems are designed to help you make more efficient use of your space. We can help you store goods simply and safely while making them easily accessible.

We supply all kinds of shelving systems to help ecommerce and retail companies work more efficiently. Our solutions are perfect for companies that carry and supply a large inventory of goods. Flexible shelving systems allow you to store goods of all shapes and sizes so they are on hand as

and when required. We even supply mobile shelving units that can be reconfigured to suit the needs of your business as demand or inventory changes. We have worked with a number of companies including iwantoneofthose.com and Europe's leading online sports retailer, Kitbag.com

SHELVING SYSTEMS CASE STUDY **KITBAG.COM**

David Hague, Kitbag Operations Manager explains: “Kitbag have been in partnership with Trent design for a number of years and have successfully completed a number of large projects to assist with our phenomenal growth within ecommerce and retail operations. They have always delivered on time and within budget. The whole team are extremely professional and offer a one stop shop. They have a fantastic “can do attitude” and nothing is too much trouble. Right from the initial design and planning stages through to the installation they project manage all installations to the very last detail. It’s a pleasure to work with such a refreshing team who deliver what and when they say they will.

Trent Design have a fantastic “can do attitude” and nothing is too much trouble. Right from the initial design and planning stages through to the installation they project manage all installations to the very last detail.

David Hague

Kitbag Operations Manager, Findel PLC

CREATING YOUR PERFECT RETAIL SPACE

We can help you transform a space into a practical, elegant environment that's perfect for your merchandise and drives sales.

We work on the fitting and refurbishment of many different kinds of commercial, retail and leisure projects. As a result, we understand that food retailing is very different from jewellery. So our units and accessories can be tailored to your business.

From a temporary exhibition stand to a full shopfit, we manage your project from design to installation. And on the way, computer-aided design lets you see how your shop will look before our craftsmen get to work bringing it to life.

SHOPFITTING SYSTEMS CASE STUDY **STOREBEST UK LTD**

Trent Design has worked in partnership with Storebest UK for a number of years to install their products in to the high street. The combination of Storebest's knowledge of manufacturing and product design and installation expertise, we are able to offer our clients a complete turnkey package.

“Our project with Trent Design for Dunelm Mill has been a great success, completing the installation of their new Dartford Store in around 12 days. This ensured that we met our clients' needs and expectations. We look forward in continuing the growth in our working relationship.”
